(54) Title: MOBILE FILTRATION FACILITY AND METHODS OF USE

(57) Abstract: A mobile first housing bounds a substantially sterile clean room, a filtration room, and at least one change room communicating between clean room. A fluid filtration system is disposed within the first housing, the filtration system includes a first support container in which a disposable fill bag is disposed. A disposable fluid line extends between the fill bag and the at least one filter. A support bin is also disposed within the first housing. A disposable pooling bag is disposed within the support bin, the pooling bag being in fluid communication with the at least one filter. A disposable fill line has a first end in fluid communication with the pooling bag and an opposing second end disposed within the clean room.
